CONCLUSION

In this study, the TRUEresult System demonstrated accurate performance in the hands of both healthcare professionals and first-time users.

Clinical data obtained by both first-time users and healthcare professionals exceeded the minimum accuracy criteria for EN ISO 15197:2003 and the more rigorous minimum accuracy criteria for ISO 15197:2013.

First-time users of the TRUEresult System agreed that the instructions were easy to understand and the system was easy to use.

The TRUEresult System produced precise results as evidenced by a Standard Deviation value of 2.5%.

TRUEresult Test Strips can be used with TRUEresult, TRUEresult mini, and TRUEresult Twist2 meters.

Laser Etched Quad-Electrode Technology provides precision and accuracy of test results.

Two fill-detect electrodes ensure adequate blood sample, preventing false starts and erroneous results.

Two electrodes accurately measure the glucose reaction and send signal to sensor.

TRUEfill Technology allows for precise sampling.

TRUEresult

Accurate Results

Advanced Technology Features:
• No coding
• Results as fast as 4 seconds
• Tiny 0.5 microlitre sample size
• Stores 500 results with time/date
• 7, 14 and 30-day averaging
• Control solution detection
• Strip release button
• 4 testing reminder alarms
• Weekday display
• Audible fill detection
• Ketone test reminder
• Alternate site testing
• Data management capabilities
• Automatic on/off

TRUEresult mini

The sleek design that fits your lifestyle.

Advanced Technology Features:
• No coding
• Results as fast as 4 seconds
• Tiny 0.5 microlitre sample size
• Stores 500 results with time/date
• 7, 14 and 30-day averaging
• Control solution detection
• Strip release
• Alternate site testing
• Easy-to-read display
• Data Management Capabilities

TRUEresult twist

Advanced Technology Features:
• No coding
• Results as fast as 4 seconds
• Tiny 0.5 microlitre sample size
• Stores 500 results with time/date
• 7, 14 and 30-day averaging
• Control solution detection
• Alternate site testing
• Data Management Capabilities
• Automatic on/off

TRUEresult Test Strips can be used with all 3 meters!
