Antimicrobial Activity Testing

Testing of the antimicrobial activity of the following was performed:

Product: LCX Labs Hand Sanitizer (Batch 88036126)
Company: LCX Labs
Active ingredients: 70% alcohol

Details:

The test organisms used were: *Pseudomonas aeruginosa* (ATCC 15442),
Staphylococcus aureus (ATCC 6538)

Specification: BS EN 1040 : 2005 “ Chemical disinfectants and antiseptics –
Quantitative suspension test for the evaluation of basic bactericidal activity of
chemical disinfectants and antiseptics – Test method and requirements (Phase 1)

Date of test: 16 Mar 2020

Summary:

A sample of the product has been tested and is found to meet with the requirements of the above specification with at least 99.99% antibacterial efficacy.

Sincerely yours,

Professor Loh Xian Jun Prof. (Adj.) NUS, Prof. (Adj.) NTU, FRSC, Ph.D

This letter applies to the sample of the specific product given at the time of its testing. The results are not used to indicate or imply that they are applicable to other similar items. In addition, such results must not be used to indicate or imply that A*STAR approves, recommends or endorses the manufacturer, supplier or user of such product or that A*STAR in anyway "guarantees" the later performance of the product. Unless otherwise stated, no tests were conducted to determine the long term effects of using the specific product. The sample mentioned in this letter is manufactured/supplied by the client. A*STAR therefore assumes no responsibility for the accuracy of information on the brand name, model number, origin of manufacture, consignment or any information supplied.
